.MY domain just got faster

One of the important questions when you have purchased .MY is when you can start using the domain name. This element is directly related to how fast MYNIC DNS activation is done. Previously, normal range for activation is 6 hours on business days and 7 hours on weekends.

On 19th February 2016, our DNS activation time has been improved as below:

Days	Previous	Now
Business Days	6 hours	3 hours
Weekends & Holidays	7 hours	4 hours

It means no more long waiting time and you can start using .MY faster than ever before. This will also apply when you make any domain name modification.

However, it is important to remember that each activation is upon successful payment and registration after 11.00 pm will be processed on the next business day.
